Toddlers on Technology

TODDLERS ON TECHNOLOGY Does your toddler seem to know more about the iPad than you do? Welcome to the world of the Digitods: the young children born into the era of mobile technology. These kids are learning faster and better than any generation that has come before them. And they are loving it! Take a look at toddlers using an iPad. They are pictures of concentration. Their hands are moving and their eyes are constantly scanning the screen. They are in an active state of learning: their neurons are firing on all cylinders! It is not surprising that they find learning such an enjoyable activity, with the bright colors, interesting activities and cheery voices urging them on. Have you ever tried getting a Digitods attention when he is working with an iPad? It is not easy. Often, the child is so fixated on the work that he protests when he has to move on, even to something as interesting as a snack. It just underscores what teachers have always known. Good learning is addictive: the more you get, the more you want. Digitods are racing down the information superhighway and we have to be ready for them! But what does this entail? The answer to this ever-important question lies within. Patti Wollman Summers has written the first book on the subject by an early childhood educator. Ms. Summers collaborates with Heather Ibrahim-Leathers, a mom who provides many practical tips, and Ann DeSollar-Hale, PhD, a neuropsychologist who gives a full account of the research so far in our Science section. Learn why interacting with an app is so fascinating to a young child. Discover what constitutes a good app, and how to match an app to your child's temperament and learning style. Read a description of many excellent apps in our App Reviews section, and learn how to balance your child's digital work with real-life, see-saw activities. For parents of children under six who are concerned about their child's development in a surprisingly unfamiliar world, **TODDLERS ON TECHNOLOGY** is a must-read! The Parent's Guide to Play

Raymond is a talented young artist who carries his work from homeless shelter to homeless shelter in a tattered bag but has never even been inside a museum. He is emblematic of the children that the renowned pediatrician and children's advocate Irwin Redlener has met over the course of his long and colorful career. Inadequate education, barriers to health care, and crushing poverty make it overwhelmingly difficult for many children to realize their dreams. In this memoir, Redlener draws on poignant personal experiences to investigate the nation's healthcare safety net and special programs that are designed to protect and nurture our most vulnerable kids, but that too often fail to do so. The book follows Redlener's winding career, from his work as a pediatrician in the Arkansas delta, to treating child abuse in a Miami hospital, to helping children in the aftermath of 9/11 and Hurricane Katrina. The reader accompanies him to the board of USA for Africa, to cofounding the Children's Health Fund with Paul Simon, as he persuades Joan Baez to play a benefit concert for his clinic in rural Arkansas, and to dinner with Fidel Castro. But what has motivated him most powerfully are the children who struggle with terrible adversities yet dream of becoming paleontologists, artists, and marine biologists. These stories are his springboard for discussing larger policy issues that hinder us from effectively eradicating childhood poverty and overcoming barriers to accessible health care. Persistent deprivation and the avoidable problems that accompany poverty ensnare millions of children, with rippling effects that harm the health, prosperity, and creativity of the adults they become. Redlener argues that we must drastically change our approach to meeting the needs of children—for their sake and to ensure America's resiliency and influence in an increasingly complex and challenging world.

Two artists, two styles, and one book that may not be big enough for the both of them. See, Ink (the mouse) likes things to be clean and precise. Scribbles (the cat) is the opposite. But while there should be plenty of room for each of them to make their art without getting in each others way, or on each others nerves, **THEY CAN'T MANAGE THAT!** And from there paint splatters, ink goops, pencils get broken and brushes go wild until... it's not a work of art, **IT'S A MESS!** Discovering that they are no longer having any fun, the duo tentatively tries to collaborate instead of clobber, and, thus, a disaster-piece becomes a masterpiece. With this much creative friction, will this disaster-piece ever become a masterpiece?

The Ugly Duckling (Illustrated)

Rare edition with unique illustrations. Hans Christian Andersen was a Danish author best known for writing children's stories including "The Little Mermaid" and "The Ugly Duckling." But he didn't just write short stories, and his intended audience wasn't restricted to children. In addition to his fairy tales, Andersen wrote poems, plays, novels, travel books, essays, and more. He hungered for recognition at home (Denmark) and abroad-and he got it! Eventually. Today, his stories can be read in over one hundred languages. But no matter what language they're in, Andersen's tales have got something for everyone. In them, you'll find beauty, tragedy, nature, religion, artfulness, deception, betrayal, love, death, judgment, penance, and-occasionally-a happy ending. They're complex tales, but since Andersen himself was pretty complex, we like to think that art imitates life. Or something like that. "The Ugly Duckling" is a literary fairy tale by Danish poet and author Hans Christian Andersen. The story tells of a homely little bird born in a barnyard who suffers abuse from the others around him until, much to his delight (and to the surprise of others), he matures into a beautiful swan, the most beautiful bird of all. The story is beloved around the world as a tale about personal transformation for the better.

Don't Worry, Be Happy! Or Else!

Sustainable development and rural policies have pursued strategies where farming has been often regarded as a factor deteriorating the ecosystem. But the current economic, social and environmental problems of the Earth probably call for examples of a positive integration between human society and nature. This research work presents more than a hundred case studies where the historical relationships between man and nature have generated, not deterioration, but cultural, environmental, social and economic values. The results show that is not only the economic face of globalization that is negatively affecting the landscape, but also inappropriate environmental policies. The CBD-UNESCO program on biocultural diversity, the FAO Globally Important Agricultural Heritage Systems and several projects of the International Union of Forest Research Organizations, as well as European rural policies acknowledge the importance of cultural values associated to landscape. This research intends to support these efforts.

Education and Peace

A collection of essays from the visionary storyteller Gianni Rodari about fairy tales and folk tales and their great advantages in teaching creative storytelling. "Rodari grasped children's need to play with life's rules by using the grammar of their own imaginations. They must be encouraged to question, challenge, destroy, mock, eliminate, generate, and reproduce their own language and meanings through stories that will enable them to narrate their own lives." --Jack Zipes "I hope this small book," writes renowned children's author Gianni Rodari, "can be useful for all those people who believe it is necessary for the imagination to have a place in education; for all those who trust in the creativity of children; and for all those who know the liberating value of the word." Full of ideas, glosses on fairytales, stories, and wide-ranging activities, including the fantastic binomial, this book changed how creative arts were taught in Italian schools. Translated into English by acclaimed children's historian Jack Zipes and illustrated for the first time ever by Matthew Forsythe, this edition of The Grammar of Fantasy is one to live with and return to for its humor, intelligence, and truly deep understanding of

children. A groundbreaking pedagogical work that is also a handbook for writers of all ages and kinds, *The Grammar of Fantasy* gives each of us a playful, practical path to finding our own voice through the power of storytelling. Gianni Rodari (1920-1980) grew up in Northern Italy and wrote hundreds of stories, poems, and songs for children. In 1960, he collaborated with the Education Cooperation Movement to develop exercises to encourage children's creative and critical thinking abilities. Jack Zipes is a renowned children's historian and folklorist who has written, translated, and edited dozens of books on fairytales. He is a professor at the University of Minnesota. Matthew Forsythe lives in Montreal where he draws and paints for picture books, comics, and animations.

Italian Historical Rural Landscapes

Isaac Bashevis Singer is known for his mastery of storytelling - but it was not until 1966, at the age of sixty-two, that he published his first children's book, *Zlateh the Goat*, a Newbery Honor Book and instant classic. Singer went on to write many stories for children, most of which are included in this volume, along with a brief introduction and a special epilogue, "Are Children the Ultimate Literary Critics?" The collection presents exuberant and timeless tales for children rich in fantasy and deeply rooted in the lost cultural tradition of his native Poland. A number of the stories appear in book form for the first time - and all have been translated from the Yiddish with the author's personal supervision.

The inspirational story of how Nobel Prize winner Muhammad Yunus invented microcredit, founded the Grameen Bank, and transformed the fortunes of millions of poor people around the world. Muhammad Yunus was a professor of economics in Bangladesh, who realized that the most impoverished members of his community were systematically neglected by the banking system -- no one would loan them any money. Yunus conceived of a new form of banking -- microcredit -- that would offer very small loans to the poorest people without collateral, and teach them how to manage and use their loans to create successful small businesses. He founded Grameen Bank based on the belief that credit is a basic human right, not the privilege of a fortunate few, and it now provides \$24 billion of micro-loans to more than nine million families. Ninety-seven percent of its clients are women, and repayment rates are over 90 percent. Outside of Bangladesh, micro-lending programs inspired by Grameen have blossomed, and serve hundreds of millions of people around the world. The definitive history of micro-credit direct from the man that conceived of it, *Banker to the Poor* is the moving story of someone who dreamed of changing the world -- and did.

Stories for Children

While the battles for modern art and society were being fought in France and Spain, it has seemed a betrayal that John Betjeman and John Piper were in love with a provincial world of old churches

and tea-shops. In this multi-awardwinning book now available in paperback Alexandra Harris tells a different story. In the 1930s and 1940s, artists and writers explored what it meant to be alive in England. Eclectically, passionately, wittily, they showed that the modern need not be at war with the past. Constructivists and conservatives could work together, and even the Bauhaus émigré, László Moholy-Nagy, was beguiled into taking photographs for Betjemans nostalgic Oxford University Chest. This modern English renaissance was shared by writers, painters, gardeners, architects, critics, tourists and composers. John Piper, Virginia Woolf, Florence White, Christopher Tunnard, Evelyn Waugh, E. M. Forster and the Sitwells are part of the story, along with Bill Brandt, Graham Sutherland, Eric Ravilious and Cecil Beaton.

In Praise Of Imperfe

In his new book Michel Odent shows how farming and childbirth have been industrialized side by side during the 20th century - with dramatic and disturbing consequences. The similarities are striking. In both cases innovations have been presented as the long awaited solution to an old problem: the advent of powerful synthetic insecticides has, overnight, dramatically reduced the costs and increased agricultural productivity; the advent of the modern safe technique of caesarean section has offered serious new reasons to create gigantic obstetrical departments. In both spheres a small number of skeptics voiced doubts and fears concerning the negative long-term consequences of the widespread use of novel, little tested practices; although these repeated warnings initially went unheeded, they have motivated the development of "alternative" approaches and movements. At the turn of the new century the history of industrialized farming has suddenly speeded up. A collective global awareness has been sparked by a series of disasters, particularly "mad cow" and foot and mouth diseases. Industrialized childbirth has not yet reached the same phase of its history, but the parallels between these two industries suggest that there is more to link the farmer and the obstetrician than we had all realized..

Romantic Moderns

What has happened to America, and what's become of the American dream? Behind the self-confident image of world's most influential country, we now see a nation tearing itself apart. The United States may be arguably the world's only superpower, but its internal tensions are a symptom of suffering and division, a condition only exacerbated by the election of President Donald Trump. In this searing account, expatriate journalist Alan Friedman returns after thirty years in Europe and examines the real

America through the mouths of its citizens. Set against the backdrop of the 2016 presidential election campaign and the inauguration of President Trump, Friedman tells a vivid story of terrible inequality - from the excesses of Wall Street to the grinding poverty of Mississippi - and explores the issues, from racism and gun control to Obamacare, that have polarised a nation. Drawing on his personal interviews with Trump and with Russia's President Putin, Friedman paints a detailed portrait of the new leader of the free world and explores the real risks of the Trump presidency for America and for the world. Dark and provocative, *This Is Not America* may just be the most important book of the year.
