Northern Africa is dominated by the Sahara Desert, stretching across the continent from the Atlantic Ocean to the Red Sea. This book is about the people who lived around the edges of the Desert and the different ways in which they responded to its challenges, establishing networks of communication across its expanse. But the Sahara has not always been a desert. From about 9000 BC the region began to enjoy a warm, humid period allowing vegetation to flourish and wild animals to move in. Humans soon followed practising pastoral economies but with the onset of harsher conditions once more around 3000 BC the desert reclaimed its own. Since then fluctuations in climate have continued to affect the lives of people living around the desert fringes. The communities occupying the North African Coast and in the Nile Valley have come under the influence of the states dominating the Near East and the Mediterranean but those living in the Sahel to the south of the desert have developed their own distinctive cultures. The book tells the story of the growing links between the two worlds, showing that Africa played a crucial part in the development of the Old World before it was drawn into the story of the New World.

The little-known history of how the Sahara was transformed from a green and fertile land into the largest hot desert in the world. The Sahara is the largest hot desert in the world, equal in size to China or the United States. Yet, this arid expanse was once a verdant, pleasant land, fed by rivers and lakes. The Sahara sustained abundant plant and animal life, such as Nile perch, turtles, crocodiles, and hippos, and attracted prehistoric hunters and herders. What transformed this land of lakes into a sea of sands? When the Sahara Was Green describes the remarkable history of Earth's greatest desert—including why its climate changed, the impact this had on human populations, and how scientists uncovered the evidence for these extraordinary events. From the Sahara's origins as savanna woodland and grassland to its current arid incarnation, Martin Williams takes us on a vivid journey through time. He describes how the desert's ancient rocks were first fashioned, how dinosaurs roamed freely across the land, and how it was later covered in tall trees. Along the way, Williams addresses many questions: Why was the Sahara previously much wetter, and will it be so again? Did humans contribute to its desertification? What was the impact of extreme climatic episodes—such as prolonged droughts—upon the Sahara's geology, ecology, and inhabitants? Williams also shows how plants, animals, and humans have adapted to the Sahara and what lessons we might learn for living in harmony with the harshest, driest conditions in an ever-changing global environment. A valuable look at how an iconic region has changed over millions of years, When the Sahara Was Green reveals the desert's surprising past to reflect on its present, as well as its possible future.

This book was originally published in 1935. The Sahara, or as it is otherwise known, the Great Desert, is probably the most outstanding desert on the surface of the earth - not only because of its exceptional aridity, but by reason of its tremendous size as well. This book examines the Sahara, including chapters on the structural formation, the climate, the geological past, and the different regions of the Sahara.

A Compendious and Complete System of Modern Geography

In a book that is beautifully written and full of surprises, Marq de Villiers and Sheila Hirtle describe the Sahara desert in all its remarkable complexity. The authors' revelations reinforce some common assumptions about the "Great Emptiness" – but others are challenged. There's water in the Sahara – massive aquifers sufficient to irrigate farmlands for decades. Just fifteen per cent of the Sahara is covered by sand; much of the rest is mountainous. Sand dunes move, but they don't drift so much as hop, skip, dance, and swirl. The desert appears barren, but teems with life: lizards and snakes, jerboas and foxes, scorpions and endless swarms of bugs make their living in this harsh region. So do ancient and nomadic peoples: Berbers, Chaambra, Moors, Bedouin, Tuareg, Tubu. There has been commerce in the Sahara for hundreds of years. Salt, gold, and slaves are mined, harvested, and traded there still. The authors explore the majesty and mystery of this great African enigma in a journey that is enriched both by historical insight and practical experience.

The Geography of Africa

Michael Palin's superb No. 1 bestseller about his incredible voyage across the Sahara. Michael Palin's epic voyages have seen him circumnavigate the globe, travel from the North to the South Pole and circle the countries of the Pacific Ocean, but this was perhaps the greatest challenge yet: to cross the vast and merciless Sahara desert. As the journey unfolds, the Sahara reveals not the emptiness of endless sand dunes, but a huge and diverse range of cultures and landscapes and a long history of commerce and conquest stretching from the time of the ancient Egyptians to the oil-rich Islamic republics of today. On his way, he encounters dangers such as camel stew, being run over by the Paris-Dakar rally and Dakar nightlife, as well as returning to the original spot where THE LIFE OF BRIAN was filmed.

In the parched and seemingly lifeless heart of the Sahara desert, earthworms find enough moisture to survive. Four major mountain ranges interrupt the flow of dunes and gravel plains, and at certain times waterfalls cascade from their peaks. Even the sand amazes: massive dunes can appear almost overnight, and be gone just as quickly. We think we know the Sahara, the largest and most austere desert on Earth—yet it is full of surprises, as Marq de Villiers reveals in his brilliant and evocative biography of the land and its people. "If you traveled across the United States from Boston to San Diego, you still wouldn't have crossed the Sahara," writes de Villiers, painting a vivid picture of this most extraordinary place. He charts the course of Atlantic hurricanes, many of which are born in the Tibesti Mountains of northern Chad, and offers a fascinating disquisition on the physics of windblown sand and the formation of dunes. He chronicles the formation of the massive aquifers that lie beneath the desert, some filled with water that pre-dates the appearance of modern man on Earth. He marvels at the jagged mountains and at ancient cave paintings deep in the desert, which reveal that the Sahara was a verdant grassland 10,000 years ago—a cycle that has been repeated several times. Woven through de Villiers's story is a chronicle of the desert's nations and people: the Berbers and Arabs of the north; its black African south, whose ancestors peopled the greatest empires of Old Africa; and the extraordinary nomads—the Moors, the Tuareg (the famous "blue men"), and the Tubu—who call the desert home today. Illuminated by the eloquent written testimonies of past travelers, Sahara is a glittering geographic tour conveying the majesty, mystery, and abundance of life in what the outside world thinks of as the Great Emptiness.

Men of Men ; Shout at the Devil ; The Diamond Hunters

Wilbur Smith sets his vividly realistic novels on the razor's edge between human courage and nature's wrath. In *Hungry As The Sea*, this master storyteller takes us to the frigid South Atlantic, where one man fights for his life-- and for redemption. Nicholas Berg is steaming out of Cape Town aboard the salvage tug *Warlock*. Once Berg ruled an ocean-going empire. Now, his future has come down to a powerful boat and a daring rescue mission. One of his former ships is being lashed against the cliffs of Cape Alarm, surrounded by deadly icebergs and survivors clinging to their boats. Berg has gambled everything on reaching the *Golden Adventurer* before a competitor and a violent storm-- to win a fortune in salvage fees. But if Nick Berg succeeds, and climbs back into the international shipping game, that's when the real danger will begin... From the power of a relentless ocean to the hunger of men to survive upon her, this is a towering novel of adventure, love and the daring of the human soul.

Now, the two men--friends, competitors and partners--are searching for the legendary lost city of Opet, built by an Egyptian culture that reached Africa two thousand years ago, then vanished completely. For Ben, the expedition is a chance to prove a controversial thesis. For Louren, it is a chance to spend millions--and make it all back in gold and glory. But what awaits them is an astounding discovery, a siege of terror, and an act of betrayal that will tear the two men apart and bind them together forever... Hidden beneath water, jungle, and blood-red cliffs is a lost world where two men and a beautiful woman were caught in a furious battle of passions two thousands years ago, but which has begun once again....

When the Lion Feeds

WITH AN INTRODUCTION BY STELLA RIMINGTON It lies somewhere beneath the snow, high in the Dolomites: Nazi gold, tainted with the blood of murdered men. A tense battle of wits leads to an explosive finale in Innes' classic tale of revenge and deadly greed.

Eagle in the Sky & The Diamond Hunters

Wilbur Smith has lived an incredible life of adventure, and now he shares the extraordinary true stories that have inspired his fiction. I've been writing novels for over fifty years. I was lucky enough to miss the big wars and not get shot, but lucky enough to grow up among the heroes who had served in them and learn from their example. I have lucked into things continuously. I have done things which have seemed appalling at the time, disastrous even, but out of them have come another story or a deeper knowledge of human character and the ability to express myself better on paper, write books which people enjoy reading. Along the way, I have lived a life that I could never have imagined. I have been privileged to meet people from all corners of the globe, I have been wherever my heart has desired and in the process my books have taken readers to many, many places. I always say I've started wars, I've burned down cities and I've killed hundreds of thousands of people - but only in my imagination! From being attacked by lions to close encounters with deadly reef sharks, from getting lost in the African bush without water to crawling the precarious tunnels of gold mines, from marlin fishing with Lee Marvin to near death from crash-landing a Cessna airplane, from brutal school days to redemption through writing and falling in love, Wilbur Smith tells us the intimate stories of his life that have been the raw material for his fiction. Always candid, sometimes hilarious and never less than thrillingly entertaining, *On Leopard Rock* is testament to a writer whose life is as rich and eventful as his novels are compellingly unputdownable.
