Award-Winning Footage Of The Microscopic World Around Us - Award-Winning Footage Of The Microscopic World Around Us by Insider Science 18,493,538 views 5 years ago 3 minutes, 20 seconds - This year's Nikon Small World Motion Photomicrography Competition has given us a fascinating glimpse into the realm of the ...

Just beyond the limits of human sight...

Is an unseen universe that only microscopes can explore.

These are the gears of a pocket watch ticking away time.

Some of this footage is helping researchers crack nature's mysteries.

Like this video filmed over 16 hours...

It reveals how a baby zebrafish's nervous system develops.

In second place were these electrifying green.

They're actually a laser beam shooting through soap bubbles...

Bending and refracting into a dazzling display of light.

And in third place was this marine worm.

No, it's not playing an instrument...

It's just trying to swallow something.

In fourth place is this footage of an expectant mother.

She's a tiny Daphnia water flea...

And is having twins!

But these award winners are just the tip of the iceberg.

If you're a baby stinkbug, then it's an egg hatching under a leaf.

What about these growing golden crystals?

Just a bit of soy sauce that's drying up.

The salts begin to crystallize as the water evaporates away.

Microstomum lineare: an aquatic worm that likes to wriggle.

These fat cells of a mouse are dividing and multiplying.

This creature is magnified about four to six times.

Inside each of our cells is a dynamic network of structural tubes.

And our bodies are constantly fighting off enemies...

The microscopic world around us is mesmerizing to watch.
