INTERACTIONS The politics of administration involves agency interactions with those outside the formal structure as well as interactions among those within administrative agencies.

MANAGERIAL Despite these differences, managerial skills and relevant experience are essential prerequisites to leading public agencies. Networking and organizing skills are the indispensable foundation on which actual operations are built and sustained.

LEADERSHIP There is a growing emphasis on individual character and leadership as opposed to simply managing established, routine operations.

SERVICES There is also a continuing interest in improving the quality and reliability of services provided in both public and private organizations.

STRUCTURES Another concern is the prospect of transforming organizational structures, given the many changes in information communication technology.

CHALLENGES Still other concerns for managers include the challenge of providing career development for employees and applying emergent customer service techniques to running large, complex bureaucratic organizations.

The Meaning The word 'administration' has been derived from Latin words 'ad' = to and 'ministrare' = serve 'Public' =people or citizens Management = POSDCORB Planning, Organizing, Staffing, Directing, Coordination, Reporting, Budgeting Cooperative human endeavour to achieve given goals The process of public administration consists of the actions involved in effecting the intent or desire of a government. It is thus the continuously active, 'business' part of government, concerned with carrying out the law, as made by legislative bodies (or other authoritative agents) and interpreted by the courts, through the processes of organization and management.

WHAT IS DEMOCRACY ?

Individualism means that the dignity and integrity of individual is of supreme importance. It suggests that achieving the fullest potential of each individual is the best measure of the success of political system and government

Citizens should have the right to the maximum opportunity to select own purpose in life and choose means to accomplish these. The citizen should be facilitated rather than hindered in their pursuit to a meaningful life.

EXPLAINING THE GROWTH OF BUREAUCRACY

BEHAVIOR Bureaucratic behavior is assumed to follow the intent of the legislature in the form of legislative enactments and guidelines for implementation.

DIRECTION Bureaucracy relies on the legislature for substantive policy direction and for financial and political support. The legislature, in turn, looks to the bureaucracy for faithful and competent administration of the laws.

INTENT Legislative intent describes the goals, purposes, and objectives of a legislative body.

Bureaucracies are assumed to follow legislative intent in implementing law.

SUBORDINATE The legislature is expected to supervise the work of the bureaucracy. Bureaucracy is distinctly subordinate to the will and initiative of other parts of the government

OVERSIGHT Legislative oversight the process by which a legislative body supervises the work of the bureaucracy in order to ensure its conformity with legislative intent

SPECIALISTS It was traditionally assumed that the bureaucracy would be a neutral, professional, competent structure staffed by specialists in both general administrative processes and their respective specific policy areas.
