The Age of Disconnection

From cell phones to Google Glass - and eventually brain chips - technology is increasingly playing a major role in our lives. Previously unheard of disorders are appearing parallel to these trends. "Digital dementia" is beginning to plague young people across the developed world. A "new social awkwardness" is gripping their lives. The Age of Disconnection explores these new social phenomena associated with our addiction to technology. The technological elite plan to make these individuals - who they see as a generation of "easily deceived barbarians" that are unfit for the future - and the rest of the human race obsolete. Human connection is fading in the technological era while the age of robotics rapidly approaches. In The Age of Disconnection you will learn the secrets to staying truly connected in a wired world.

Digital Lethargy

The exhaustion, disappointment, and listlessness experienced under digital capitalism, explored through works by contemporary artists, writers, and performers. Sometimes, interacting with digital platforms, we want to be passive—in those moments of dissociation when we scroll mindlessly rather than connecting with anyone, for example, or when our only response is a shrugging "lol." Despite encouragement by these platforms to "be yourself," we want to be anyone but ourselves. Tung-Hui Hu calls this state of exhaustion, disappointment, and listlessness digital lethargy. This condition permeates our lives under digital capitalism, whether we are "users," who are what they click, or racialized workers in Asia and the Global South. Far from being a state of apathy, however, lethargy may hold the potential

for social change. Hu explores digital lethargy through a series of works by contemporary artists, writers, and performers. These dispatches from the bleeding edge of digital culture include a fictional dystopia where low-wage Mexican workers laugh and emote for white audiences; a group that invites lazy viewers to strap their Fitbits to a swinging metronome, faking fitness and earning a discount on their health insurance premiums; and a memoir of burnout in an Amazon warehouse. These works dwell within the ordinariness and even banality of digital life, redirecting our attention toward moments of thwarted agency, waiting and passing time. Lethargy, writes Hu, is a drag: it weighs down our ability to rush to solutions, and forces us to talk about the unresolved present.

Social Work in the Age of Disconnection

"This edited text brings together the stories of nine clinical social workers working during COVID-19, exploring the disconnections caused by a forced use of technology as well as the disconnections apparent in a time of social injustice. Employing narrative strategies to capture this transformative moment of our history, these chapters explore the effects of technology and social media on psychotherapy, the delivery of services for the chronically mentally ill and elderly, as well as the consequences of recent cultural shifts on our conceptions of gender, sexuality, race, the immigrant experience, and political activism. While traditional research methodologies tend to address social problems as if they were divorced from the lives and experiences of human beings, these chapters employ phenomenological description of how the existing system functions, to identify theory-to-practice gaps and to recover the experiences of the person within the various institutional structures. Divided into three parts, each chapter begins with pre-reading and close reading questions and ends with writing prompts, allowing for practitioners and students to examine their own thoughts, and put what they have learnt into practice. Suitable for students of clinical social work and practicing mental health professionals, this book is essential for those wanting to make sense of social work practice in our constantly evolving times"--

I Have Something to Say

A veteran journalist discovers an ancient system of speech techniques for overcoming the fear of public speaking—and reveals how they can profoundly change our lives. In 2010, award-winning journalist John Bowe learned that his cousin Bill, a longtime extreme recluse living in his parents' basement, had, at the age of fifty-nine, overcome a lifetime of shyness and isolation—and gotten happily married. Bill credited his turnaround to Toastmasters, the world's largest organization devoted to teaching the art of public speaking. Fascinated by the possibility that speech training could foster the kind of psychological well-being more commonly sought through psychiatric treatment, and intrigued by the notion that words can serve as medicine, Bowe set out to discover the origins of speech training—and to learn for himself how to speak better in public. From the birth of democracy in Ancient Greece until two centuries ago, education meant, in addition to reading and writing, years of learning specific, easily taught language techniques for interacting with others. Nowadays, absent such education, the average American speaks 16,000 to 20,000 words every day, but 74 percent of us suffer from speech anxiety. As he joins Toastmasters and learns, step-by-step, to successfully overcome his own speech anxiety, Bowe muses upon our record levels of loneliness, social isolation, and political divisiveness. What would it mean for Americans to learn once again the simple art of talking to one another? Bowe shows that learning to speak in public means more than giving a decent speech without nervousness (or a total meltdown). Learning to connect with others bestows upon us an enhanced sense of freedom, power, and belonging.

The Disconnect

Could you disconnect from your phone for six weeks? Esther and her classmates are put to the test in this thought-provoking story of life in the social-media age from award-winning author Keren David. Particularly suitable for struggling, reluctant or dyslexic readers aged 13+

The Winter of Our Disconnect

For any parent who's ever IM-ed their child to the dinner table - or yanked the modem from its socket in a show of primal parental rage - this account of one family's self-imposed exile from the Information Age will leave you ROFLing with recognition. But it will also challenge you to take stock of your own family connections, to create a media ecology that encourages kids - and parents - to thrive. When journalist and commentator Susan Maushart first decided to pull the plug on all electronic media at home, she realised her children would have sooner volunteered to go without food, water or hair products. At

ages 14, 15 and 18, her daughters and son didn't use media. They inhabited media. Just exactly as fish inhabit a pond. Gracefully. Unblinkingly. And utterly without consciousness or curiosity as to how they got there. Susan's experiment with her family was a major success and she found that having less to communicate with, her family is communicating more. At the simplest level, *The Winter of Our Disconnect* is the story of how one family survived six months of wandering through the desert, digitally speaking, and the lessons learned about themselves and technology along the way. At the same time, their story is a channel to a wider view - into the impact of new media on the lives of families, into the very heart of the meaning of home.

The Big Disconnect

Clinical psychologist Catherine Steiner-Adair takes an in-depth look at how the Internet and the digital revolution are profoundly changing childhood and family dynamics, and offers solutions parents can use to successfully shepherd their children through the technological wilderness. As the focus of the family has turned to the glow of the screen—children constantly texting their friends or going online to do homework; parents working online around the clock—everyday life is undergoing a massive transformation. Easy access to the Internet and social media has erased the boundaries that protect children from damaging exposure to excessive marketing and the unsavory aspects of adult culture. Parents often feel they are losing a meaningful connection with their children. Children are feeling lonely and alienated. The digital world is here to stay, but what are families losing with technology's gain? As renowned clinical psychologist Catherine Steiner-Adair explains, families are in crisis as they face this issue, and even more so than they realize. Not only do chronic tech distractions have deep and lasting effects but children also desperately need parents to provide what tech cannot: close, significant interactions with the adults in their lives. Drawing on real-life stories from her clinical work with children and parents and her consulting work with educators and experts across the country, Steiner-Adair offers insights and advice that can help parents achieve greater understanding, authority, and confidence as they engage with the tech revolution unfolding in their living rooms.

Reckoning with Social Media

Social media use is pervasive, and so is its perceived harmful effects, dubbed 'techlash'. Disconnection practices—restricting, detoxing, deleting—often reinforce rather than confront the ways social media organize attention, everyday life, and society. This book addresses the ambivalence, commodification, and complicity involved in attempts to separate from social media.

Speaking of Sadness

"*Speaking of Sadness*, based on fifty in-depth interviews, provides first-hand accounts of the depression experience while discovering clear regularities in the ways that personal identities are shaped over the course of an "illness career." The new edition of the book is highlighted by a thoroughly new and extensive introduction"--

Disconnection

In two interconnected, alternating stories, Claude Ollier has written a disturbing, haunting, apocalyptic novel that brings together the end of the Third Reich with the closing of the twentieth century. The first is the autobiographical story of Martin, a French student conscripted into a munitions factory in Nuremberg in the middle of World War II. The other is the story of a nameless writer who inhabits a twilight world where civilization has collapsed.

Social Work in the Age of Disconnection

This edited text brings together the stories of nine clinical social workers working during COVID-19, exploring the disconnections caused by a forced use of technology as well as the disconnections apparent in a time of social injustice. Employing narrative strategies to capture this transformative moment of our history, these chapters explore the effects of technology and social media on psychotherapy, the delivery of services for the chronically mentally ill and elderly, as well as the consequences of recent cultural shifts on our conceptions of gender, sexuality, race, the immigrant experience, and political activism. While traditional research methodologies tend to address social problems as if they were divorced from the lives and experiences of human beings, these chapters employ phenomenological description of how the existing system functions, to identify theory-to-practice gaps and to recover

the experiences of the person within the various institutional structures. Divided into three parts, each chapter begins with pre-reading and close reading questions and ends with writing prompts, allowing for practitioners and students to examine their own thoughts, and put what they have learnt into practice. Suitable for students of clinical social work and practicing mental health professionals, this book is essential for those wanting to make sense of social work practice in our constantly evolving times.

The Disconnect

We all live online now, but what does that mean in IRL? How do strange subcultures on reddit affect our local shopping centres, what do night gyms owe to Twitter, and where can we really go to get some decent sleep? Our every move online is watched, but can we see ourselves? In these wide-ranging, witty essays, Roisin Kiberd offers immersive insight into the strange worlds, habits and people who have grown up with the internet, and shows the way our world is changing to fit the online fever-dream. Unsettling, clear-sighted and perversely fun, she traces the lines between Netflix and nap hotels, vaporwave music and camgirls, self-optimisation and insomnia, dating apps and a grand unified theory of Monster Energy Drinks. As well as holding up the zeitgeist for scrutiny, she turns an equally frank eye on her own life online, and asks what we have gained, what we have lost, and what we have given willingly away in exchange for this connected world.

Handbook of Research on Technoself: Identity in a Technological Society

"This book provides insights to better enhance the understanding of technology's widespread inter-twinement with human identity within an advancing technological society"--Provided by publisher.

Disconnected

OUT NOW: The new book by Sunday Times bestselling author, Emma Gannon I love Emma Gannon's wise and refreshing perspective on work, and more broadly on the challenges of building a meaningful life in an era of distraction, overwhelm and uncertainty. - Oliver Burkeman, New York Times Bestselling author of Four Thousand Weeks A sensible, kind and useful book about forging a healthier relationship with social media. - Marian Keyes, Sunday Times Bestselling author _____ Millennials might have grown up online but now they want to log off. And it's not just millennials. A year of lockdowns, Zoom meetings and reduced physical contact has made us more dependent on the internet than ever before - but has it lost its humanity? Our focus on community and real connection has been sent off-course and we're becoming more aware of how the algorithm manipulates us and how our data has made us a product to be sold. So, where do we go from here and how can we get back on track? (Dis)connected examines these topics and offers tangible tips and advice for those of us who might feel a little lost right now and want to find themselves again. _____ Emma Gannon is a cordial and provocative spirit. Read her, listen to her, explore her world and the world at large through her eyes. Hers is a journey well worth taking. - Julia Cameron, New York Times Bestselling author of The Artist's Way

Disconnect

Since moving hundreds of miles to a new school, Daria has become increasingly dependent on her cell phone. Texts, Facebook and phone calls are her only connection to her friends in Calgary, and Daria needs to know everything that is going on at home to feel connected to her old life. Her cell phone habit looks a lot like addiction to her mother and to her new friend Cleo. Daria dismisses the idea of technology addiction as foolish until her habit puts a life in danger.

Man (dis)connected

Young men are failing as never before - academically, socially and sexually. But why is this so? What are the implications? And what needs to be done about it before it's too late? Philip Zimbardo and co-writer Nikita Coulombe examine the modern meltdown of manhood and how this is manifest in the lives of young men today. They consider such factors as absent fathers, and legislation favouring women, which contribute to many men lacking social skills and direction in their lives. Most controversially, Zimbardo argues that readily available hardcore pornography and exciting gaming realities provide digital alternatives that are less demanding and far more appealing for many than sex, sports and social interaction in the real world. Immersion in these alternative realms is playing havoc with these boys' cognitive development, their ability to concentrate and their social development, allowing girls to excel in the real world where social skills are a source of success. By illuminating the symptoms and

causes of these gloomy trends, Zimbardo and Coulombe shed light on how we arrived at this state of affairs and, most significantly, what the solutions might be.

Disconnected

Examines how young people approach online activities and identifies moral and ethical oversights youth make with regard to privacy, property, and hostile speech, while suggesting ways in which parents can foster positive actions.

The Digital Disconnect

With the increased digitisation of society comes an increased concern about who is left behind. From societal causes to the impact of everyday actions, *The Digital Disconnect* explores the relationship between digital and social inequalities, and the lived consequences of digitisation. Ellen Helsper goes beyond questions of digital divides and who is connected. She asks why and how social and digital inequalities are linked and shows the tangible outcomes of socio-digital inequalities in everyday lives. The book: Introduces the key theories and concepts needed to understand both 'traditional' and digital inequalities research. Investigates a range of socio-digital inequalities, from digital access and skills, to civic participation, social engagement, and everyday content creation and consumption. Brings research to life with a range of qualitative vignettes, drawing out the personal experiences that lay at the heart of global socio-digital inequalities. *The Digital Disconnect* is an expert exploration of contemporary theory, research and practice in socio-digital inequalities. It is also an urgent and impassioned call to broaden horizons, expand theoretical and methodological toolkits, and work collectively to help achieve a fairer digital future for all. Ellen J. Helsper is Professor of Digital Inequalities at the Department of Media and Communications at London School of Economics and Political Science.

Disentangling

"After the rapid rise of digital networking in the 2000s and 2010s, we are now seeing a rise of interest in how people can disentangle their lives from the increasingly pervasive networks of digital communications. This edited volume contributes to the turn toward digital disconnection research by bringing together an interdisciplinary group of authors with expertise in various forms and philosophies of disentangling. By "disentangling" we mean disconnection not just from media but from a digitalized world, a world in which places and landscapes are increasingly structured around digital connectivity. People increasingly look for strategies that will let them reject, avoid, and rework pervasive media demanding they remain connected at all times. How might we facilitate autonomy from tendrils of digital surveillance, revalue places over dematerialized flows, and unravel digital dependency? Who gets to disconnect and who does not? How do natural cycles such as sleep and death relate to disentangling? Can we clarify the means and objectives of "digital detox"? Can we map the failures, glitches, contradictions and paradoxes that plague digital connectivity? What does our willing and unwilling entanglement in digital networks say with regard to social resilience and cultural resistance? The book's three sections start with questions about ethics and justice associated with the power geometries of digital (dis)connection, it then moves on to consider digitally entangled lives and afterlives, and concludes with a look at the ambiguities of (dis)connection in time-spaces of the COVID-19 pandemic"--

Digital Arts and Entertainment: Concepts, Methodologies, Tools, and Applications

In today's interconnected society, media, including news, entertainment, and social networking, has increasingly shifted to an online, ubiquitous format. Artists and audiences will achieve the greatest successes by utilizing these new digital tools. *Digital Arts and Entertainment: Concepts, Methodologies, Tools, and Applications* examines the latest research and findings in electronic media, evaluating the staying power of this increasingly popular paradigm along with best practices for those engaged in the field. With chapters on topics ranging from an introduction to online entertainment to the latest advances in digital media, this impressive three-volume reference source will be important to researchers, practitioners, developers, and students of the digital arts.

The Five Archetypes

Discover the personality archetypes within you and improve your life and relationships with a new self-guided system of personal transformation. In Traditional Chinese Medicine (TCM) philosophy, the elements Wood, Fire, Earth, Metal, and Water are the foundation of how nature grows and evolves. They

are believed to help us understand everything from illness and healing to the fundamental processes of child development—and they continue to inform Chinese medicine practice today. But as Ayurvedic nutritionist, reiki master, and Tournesol founder Carey Davidson demonstrates in this book, each of the five elements can also be seen as a personality archetype—and inside all of us is a unique blend of these archetypes that serves as a window into living a more fulfilling life on every level. In *The Five Archetypes*, Davidson explains that by knowing the personality traits associated with each type and using what she calls the Five Archetypes method, you can actually start to predict your behavioral patterns—not only with yourself but also with your friends, your romantic partner, your children, and even your colleagues. By practicing this method, you will also: -Learn how to exercise more control over behaviors that thwart your potential -Hone your self-awareness and self-regulation skills in the face of day-to-day stress -And understand what really makes people tick, so that you spend less time in stagnant relationships and more time in gratifying ones Through her study of the elements and the observations she's made in her work with individuals, couples, companies, parents, kids, and educators, Davidson has created a simplified and practical guide to harnessing the strengths of our five archetypes. Complete with an assessment designed to help you discover your primary, secondary, and lowest types, *The Five Archetypes* will not only teach you more about yourself and others but also transform your relationships and set you on the path to personal and interpersonal harmony.

Consciously Connecting

"In the age of technology we have become disconnected at a cellular level. The time to reconnect to ourselves and each other is now!" *Consciously Connecting* is a step-by-step guide that will enlighten and give you the ability to further connect to your inner self. Learn to enrich your relationships with others, take action, and connect within the world around you--and most importantly, with yourself. Develop healthy emotional habits, and decrease stress and anxiety with your connectivity, which will give you the inspiration to lead a more productive and creative life. This adventure will be fun, and the exercises are easy. Engage in a weekly plan of action as you commit to be cognizant and walk away from life's disconnect and distractions. Unlock the secrets to *Consciously Connecting* as you choose to achieve your goals, embrace your strengths, and define your journey. Give yourself the gift of joy and happiness through connection and watch the possibilities happen.

Disconnect

"No matter how pervasive and powerful social media websites become, users always have the option of disconnecting—right? Not exactly, as Tero Karppi reveals in this disquieting book. Pointing out that platforms like Facebook see disconnection as an existential threat—and have undertaken wide-ranging efforts to eliminate it—Karppi argues that users' ability to control their digital lives is gradually dissipating" -- Amazon.com.

Human Rights in the Age of Platforms

Scholars from across law and internet and media studies examine the human rights implications of today's platform society. Today such companies as Apple, Facebook, Google, Microsoft, and Twitter play an increasingly important role in how users form and express opinions, encounter information, debate, disagree, mobilize, and maintain their privacy. What are the human rights implications of an online domain managed by privately owned platforms? According to the Guiding Principles on Business and Human Rights, adopted by the UN Human Right Council in 2011, businesses have a responsibility to respect human rights and to carry out human rights due diligence. But this goal is dependent on the willingness of states to encode such norms into business regulations and of companies to comply. In this volume, contributors from across law and internet and media studies examine the state of human rights in today's platform society. The contributors consider the "datafication" of society, including the economic model of data extraction and the conceptualization of privacy. They examine online advertising, content moderation, corporate storytelling around human rights, and other platform practices. Finally, they discuss the relationship between human rights law and private actors, addressing such issues as private companies' human rights responsibilities and content regulation. Contributors Anja Bechmann, Fernando Bermejo, Agnès Callamard, Mikkel Flyverbom, Rikke Frank Jørgensen, Molly K. Land, Tarlach McGonagle, Jens-Erik Mai, Joris van Hoboken, Glen Whelan, Jillian C. York, Shoshana Zuboff, Ethan Zuckerman Open access edition published with generous support from Knowledge Unlatched and the Danish Council for Independent Research.

Disconnect

"As [Disconnect] shows, cell phones may actually be doing damage to far more than our attention spans-and could, in fact, be killing us." -Salon.com. Since the invention of radar, cell phone radiation was assumed to be harmless because it wasn't like X-rays. But a sea change is now occurring in the way scientists think about it. The latest research ties this kind of radiation to lowered sperm counts, an increased risk of Alzheimer's, and even cancer. In Disconnect, National Book Award finalist Devra Davis tells the story of the dangers that the cell phone industry is knowingly exposing us-and our children-to in the pursuit of profit. More than five billion cell phones are currently in use, and that number increases every day. Synthesizing the findings and cautionary advice of leading experts in bioelectricalmagnetics and neuroscience, Davis explains simple safety measures that no one can afford to ignore.

The Art of Disconnection

The Art of Disconnection, Crafting a Balanced Life in a Hyperconnected World is a powerful book written by Samyak More, He challenges us to redefine our relationship with technology in the age of digital overload. More offers a compelling and practical guide to navigating the complexities of our hyperconnected world. Samyak believes that technology, while a powerful tool, can easily become a master if we lack intention and awareness. The Art of Disconnection empowers readers to cultivate tech literacy, set healthy digital boundaries, and rediscover the joy and fulfillment that thrives beyond the confines of the screen.

The Need for Roots

Hailed by Andre Gide as the patron saint of all outsiders, Simone Weil's short life was ample testimony to her beliefs. In 1942 she fled France along with her family, going firstly to America. She then moved back to London in order to work with de Gaulle. Published posthumously The Need for Roots was a direct result of this collaboration. Its purpose was to help rebuild France after the war. In this, her most famous book, Weil reflects on the importance of religious and political social structures in the life of the individual. She wrote that one of the basic obligations we have as human beings is to not let another suffer from hunger. Equally as important, however, is our duty towards our community: we may have declared various human rights, but we have overlooked the obligations and this has left us self-righteous and rootless. She could easily have been issuing a direct warning to us today, the citizens of Century 21.

Disconnection

There are no clues to the identity of a serial killer in New Orleans, who police believe may be involved with the occult, until a young woman finds a stranger's cell phone. When it rings she answers, and finds herself connected to the killer's most recent victim. Original.

Digital Detox

Against a backdrop of increasingly intrusive technologies, Trine Syvertsen explores the digital detox phenomenon and the politics of disconnection from invasive media. With a wealth of examples, the book demonstrates how self-regulation online is practiced and delves into how it has also become an expression of resistance in the 21st century.

Lost Connections

THE INTERNATIONAL BESTSELLER: A radically new way of thinking about depression and anxiety 'A book that could actually make us happy' SIMON AMSTELL 'This amazing book will change your life' ELTON JOHN 'One of the most important texts of recent years' BRITISH JOURNAL OF GENERAL PRACTICE 'Brilliant, stimulating, radical' MATT HAIG 'The more people read this book, the better off the world will be' NAOMI KLEIN 'Wonderful' HILLARY CLINTON 'Eye-opening' GUARDIAN 'Brilliant for anyone wanting a better understanding of mental health' ZOE BALL 'A game-changer' DAVINA MCCALL 'Extraordinary' DR MAX PEMBERTON Depression and anxiety are now at epidemic levels. Why? Across the world, scientists have uncovered evidence for nine different causes. Some are in our biology, but most are in the way we are living today. Lost Connections offers a radical new way of thinking about this crisis. It shows that once we understand the real causes, we can begin to turn to pioneering new solutions – ones that offer real hope.

Dreams of disconnection

Why do we live in homes and communities built around the century-old industrial model of large service networks that use polluting resources? For more than a century, creative architects and planners have dreamed of decentralisation and self-sufficient living, not to cut themselves off from society, but to invent new modes of consumption and to rethink collective public services around common environmental values. In a time of climate crisis, changing society means changing energy infrastructures. *Dreams of disconnection* tells the story of this strand of design and planning, from its pioneers in the late nineteenth century to those applying similar ideas to tomorrow's technology two hundred years later. Lopez takes in many a utopian visionary in her tour of dreamers of disconnection, from theorists and architects to industrialists and engineers. Technology and design are the centrepieces for these projects, and their complexity, particularly around sustainable supplies of energy, food and water, so often find solutions in aesthetics. Whether these models were based around single homes or whole cities, *Dreams of disconnection* reveals that there is much to be learnt and marvelled at in the history of self-sufficient design.

The Costs Of Connection

Just about any social need is now met with an opportunity to 'connect' through digital means. But this convenience is not free—it is purchased with vast amounts of personal data transferred through shadowy backchannels to corporations using it to generate profit. *The Costs of Connection* uncovers this process, this 'data colonialism', and its designs for controlling our lives—our ways of knowing, our means of production, our political participation. Data colonialism is, in essence, an emerging order for the appropriation of human life so that data can be continuously extracted from it for profit. Colonialism might seem like a thing of the past, but this book shows that the historic appropriation of land, bodies and natural resources is mirrored today in pervasive datafication. Apps, platforms and smart objects capture and translate our lives into data, and then extract information that is fed into capitalist enterprises and sold back to us. The authors argue that this development foreshadows the creation of a new social order emerging globally - and it must be challenged. Confronting the alarming degree of surveillance already tolerated, they offer a stirring call to decolonize the internet and emancipate our desire for connection.

The Disconnect

A thought-provoking story of perspective and influence in the social-media age, from an award-winning author.

Digital Disconnect

Celebrants and skeptics alike have produced valuable analyses of the Internet's effect on us and our world, oscillating between utopian bliss and dystopian hell. But according to Robert W. McChesney, arguments on both sides fail to address the relationship between economic power and the digital world. McChesney's award-winning *Rich Media, Poor Democracy* skewered the assumption that a society drenched in commercial information is a democratic one. In *Digital Disconnect* McChesney returns to this provocative thesis in light of the advances of the digital age, incorporating capitalism into the heart of his analysis. He argues that the sharp decline in the enforcement of antitrust violations, the increase in patents on digital technology and proprietary systems, and other policies and massive indirect subsidies have made the Internet a place of numbing commercialism. A small handful of monopolies now dominate the political economy, from Google, which garners an astonishing 97 percent share of the mobile search market, to Microsoft, whose operating system is used by over 90 percent of the world's computers. This capitalistic colonization of the Internet has spurred the collapse of credible journalism, and made the Internet an unparalleled apparatus for government and corporate surveillance, and a disturbingly anti-democratic force. In *Digital Disconnect* Robert McChesney offers a groundbreaking analysis and critique of the Internet, urging us to reclaim the democratizing potential of the digital revolution while we still can.

Wired Child

In "Wired Child," child and adolescent psychologist Dr. Richard Freed exposes the powerful myths that underlie our kids' use of technology. These myths have encouraged the "wiring up" of a generation of youth, seducing kids to spend endless hours with digital self-amusements that damage family bonding

and education, and put kids at risk of addiction. Written for parents, teachers, and others who care for children, "Wired Child" uses the science of behavior and brain function to provide a common-sense guide to build the strong families children and teens need, promote their success in school, limit their risk of tech addiction, and encourage their productive use of technology.

Disconnected Youth

Contents: (1) Introduction; (2) Background; (3) Overview of Research on Disconnected Youth: Methodology and Number of Disconnected Youth; Other Characteristics; Reasons Associated with Disconnection; (4) Analysis of Disconnected Youth: (a) Overview; Limitations; (b) Findings: Reasons Reported for Youth Not Being in School or Working; Characteristics of Disconnected Youth; Characteristics of Parents Living with Disconnected Youth; Trends Over Time; (5) Discussion: Overview; Poverty, Family Living Arrangements, and Parental Characteristics; Implications for Policy. Charts and tables.

The Big Disconnect

Argues that the growing technological world is detrimental to the human spirit and that people need to reconnect with not only other people, but also the non-human natural world.

Out of Touch

A behavioral scientist explores love, belongingness, and fulfillment, focusing on how modern technology can both help and hinder our need to connect. A Next Big Idea Club nominee. Millions of people around the world are not getting the physical, emotional, and intellectual intimacy they crave. Through the wonders of modern technology, we are connecting with more people more often than ever before, but are these connections what we long for? Pandemic isolation has made us even more alone. In *Out of Touch*, Professor of Psychology Michelle Drouin investigates what she calls our intimacy famine, exploring love, belongingness, and fulfillment and considering why relationships carried out on technological platforms may leave us starving for physical connection. Drouin puts it this way: when most of our interactions are through social media, we are taking tiny hits of dopamine rather than the huge shots of oxytocin that an intimate in-person relationship would provide. Drouin explains that intimacy is not just sex—although of course sex is an important part of intimacy. But how important? Drouin reports on surveys that millennials (perhaps distracted by constant Tinder-swiping) have less sex than previous generations. She discusses pandemic puppies, professional cuddlers, the importance of touch, "desire discrepancy" in marriage, and the value of friendships. Online dating, she suggests, might give users too many options; and the internet facilitates "infidelity-related behaviors." Some technological advances will help us develop and maintain intimate relationships—our phones, for example, can be bridges to emotional support. Some, on the other hand, might leave us out of touch. Drouin explores both of these possibilities.

The Humiliations of Welton Blake

Welton Blake's life is about to go very, very wrong when hilarity follows disaster in this sharp-witted tale of the trials of pre-teen life, from award-winning and critically acclaimed author Alex Wheatle.

The Government-Citizen Disconnect

Americans' relationship to the federal government is paradoxical. Polls show that public opinion regarding the government has plummeted to all-time lows, with only one in five saying they trust the government or believe that it operates in their interest. Yet, at the same time, more Americans than ever benefit from some form of government social provision. Political scientist Suzanne Mettler calls this growing gulf between people's perceptions of government and the actual role it plays in their lives the "government-citizen disconnect." In *The Government-Citizen Disconnect*, she explores the rise of this phenomenon and its implications for policymaking and politics. Drawing from original survey data which probed Americans' experiences of 21 federal social policies -- such as food stamps, Social Security, Medicaid, and the home mortgage interest deduction -- Mettler shows that 96 percent of adults have received benefits from at least one of them, and that the average person has utilized five. Overall usage rates transcend social, economic, and political divisions, and most Americans report positive experiences of their policy experiences. However, the fact that they have benefited from these policies has little positive effect on people's attitudes toward government. Mettler finds that shared identities and group affiliations, as well as ideological forces, are more powerful and consistent

influences. In particular, those who oppose welfare tend to extrapolate their unfavorable views of it to government in general. Deep antipathy toward the government has emerged as the result of a conservative movement that has waged a war on social welfare policies for over forty years, even as economic inequality and benefit use have increased. Mettler finds that voting patterns exacerbate the government-citizen disconnect, as those holding positive views of federal programs and supporting expanded benefits have lower rates of political participation than those holding more hostile views of the government. As a result, the loudest political voice belongs to those who have benefited from policies but who give government little credit for their economic well-being, seeing their success more as a matter of their own deservingness. This contributes to the election of politicians who advocate cutting federal social programs. According to Mettler, the government-citizen disconnect frays the bonds of representative government and democracy. The Government-Citizen Disconnect illuminates a paradox that increasingly shapes American politics. Mettler's examination of hostility toward government at a time when most Americans will at some point rely on the social benefits it provides helps us better understand the roots of today's fractious political climate.
